and an illegal threat of expenditure had been coupled with the legitimate one stready provided for. It is, of course, impossible for anyone to assert that the resolutions could have passed with for anyone to the set of the inegal purpose. It did, however, pass without the ever, pass without the ever, pass without the ever, pass without one branch of the City Council had decemed But the sum which one branch of the City Council had decemed indifficient for the legal purpose, is now found doubted. It is doubted, been, we can scarcely death, with a view to the lilegal doubted too, we can scarcely death, with a view to the lilegal doubted to act of the present injunction shall stand as to the latter, and its valided as to the other part, then the whole \$10.000 means

If the present injunction shall stand as to the latter, as pose. If the grad purpose, the property of the present of the legal purpose. But who can say that either branch of the Common Council But who can say that either branch of the Common Council of the property of the proposed of the property of even the sum of the would finally have agreed to appropriate even the sum of \$4,000 to that alone? It may well be true that there was not a setual majority of the members of either Board in favor of be legitimate part of the proposed expenditure; and that some, estiaps an essential portion, of the majority may have been in inchered in their votes by what confessedly exceeded their

we results must follow: either the series of the parties any be applied wholly to the illegal purpows, or extrawaries and innecessary sums may be havished on the legal objects of expenditure.

But it is urged that the resolution is, by its own terms, divisible, that the amendment, allowing the sum appropriated to be used to defray the expenses of the suits brought by the Mayor, can be stricken out as surplusars, and effect be given to that part of the resolutions confessesily legal.

It need not be remarked that this amendment, which is thus denominated surplusary, might, but for the injunction in this action, have two stored the whole sum appropriated from the City Treasury's to defray the expenses of the suits brought by the Mayor. But, even taking fais new view of the term surplusare, the argument's does not meet the difficulty. That consists in the fact that there is no division of the moneys to be used for the care purpose, some line must be drawn, some discretion must be experised, some judgment must be formed apon the number of counsel to be employed, the labor to be required of them, and the value of their services when rendered. Upon that point the Common Council might well judge, and, as already said, if they had declared that they thus as at apart any specific portion of the whole sum appropriated, their action would have been incapable of review in this Court. Fut the discretion confided to them on this subject cannot be exercised by the Court. The judgment or discremination of any other body or tribunal on this point would be as invaind as the act of the Common Council in the passage of the amendments in reference to the suits brought by the Mayor.

But it is also urged that there is, in fact, but one object or purpose to which the appropriation of any other body or tribunal on this point would be as invaind as the act of the Common Council in the passage of the amendments in reference to the suits brought by the Mayor.

But it is also urged that there is, in fact, but one object or purpose to whic

COURT OF GENERAL SESSIONS - JUNE 15. - Before

At the opening of the Court this morning, Mr. John McKeon, counsel for prize fighting Morrissey in the indictmen against him for felonious around and battery, moved to have the case adjourned over from this term, which, after some consultation and discussion between Mr. McKeon, Mr. Hall and the Court, was granted, and the case was put over till the September teem.

case adjourned over from this term, which, after some consultation and discussion between Mr. McKeon, Mr. Hall and the Court, was granted, and the case was put over thit the September term.

James Smith, indicted for burglary in the first degree, plended guilty to burglary in the third degree. It being the prisoner's first offense, the Court confessed their disposed to be lenient, and would give the defondant the lowest servence permitted in cases of the kind of which he stood convicted, and that was for two years in the State Prison.

John M. King, indicted for forgery, pleaded guilty to forgery in the fourth degree. In consideration of the prisoner's long incarceration, which had been now already nearly eight menths, the Court would be light with him and entence him to four months in the Penitentiary.

Peter J. Lyons, colored, pleaded guilty to petit larceny. Peter was a wine-sucker rather than a wine-labber. His larceny consisted in having stolen wines on the sucress principle, from a barrel, as it lay on the dock. He was sentenced to the Penitentiary for six months.

John McCauley pleaded guilty to keeping a disorderly house. In consequence of the prisoner's ill health judgement was suspended.

Gordon Cook, colored, was arrested for highway robbery, and pleaded guilty to grand larceny. The sentence of the Court was, that he be sent to the State prison for five years.

robbery, and pleaded guilty to grand lareety. The sentence of the Court was, that he be sent to the State prison for five years. Philip Wilson, indicted for burglary in the third de-gree, pleaded guilty to grand lareeny. It being his first offense, the Court gave him the lowest sentence of the law in such cases, viz. two years in the State prison. Georgians White and Mary Johnson were placed at

the har under an indictment for grand lacceny. This was one of those cases popularly distinguished as "shop-infling." practiced at the house of A. T. Stewart & Co. corner of Broadway and Chambers street on the 21st of May last. The defendants were charged with having come into the store on the date aforesaid under pretense of trade, and, while there, with having foloniously appropriated several valuable pieces of silk.

While the laws were helps received for the name Mrs. John-

were indicted together, the District Attorney consented to go
on, and try Mrs. White first and separately.

and that he knew the property by a private mark of the store upon it.

Officer Joseph Keefle, sworm—Said he arrested the prisoners at the store of Stewart at 4 o'dook p. m.; that he found the silk as above narrated, and that the foregoing witness. Daveaport, identified the silk as belonging to their hosse.

Another witness, Charles O'Connor, an employee at Stewart's, and he saw the silk at the Chief's office, knew it to be Stewart's, knew it by certain marks in the goods, he was present with the officer when the silk was found in the trunk.

Mr. Hell here read the defendant's deposition before the Magistrate—That she was born in New-Jersey; was 32 years of the order of the carnetty of a nurse. I living at No. 139

Magnetiste—That she was born in New Jersey; was 32 years of age, and acted in the capacity of a nurse, living at No. 139 Orchayd street.

The defense produced no witnesses, and after a very conclusive speech from the District Atterney, and a brief charge from the Judge, the case was given to the Judy. The Judy retired, and etter a very short absence returned, announcing a verdict of Guity. After the verdict Mary Johnson, acting, doubtless, and det the advice of her counsel. Mr. Spencer, and indicted with Mrs. White, conclaining it, probably, to be unnecessary to go through with the forms of a separate trial, when the evidence must be essentially the same, pleaded guilty to grand larceny.

To appreciate fully the emitence, hereinafter mentioned, of the Court upon these parties, it is necessary to state, they were jointly indicted for grand larceny under two separate indictagents—the cone for "shop-lifting" slik at 2 o'clock p m. on the day mentioned, and the other for the larceny of two more pieces of silk at 6 o'clock p, m. of the same day. This last fact could not legally come out in the first case against Mrs. White, as her indictment related to the theft committed at 2 o'clock. But it was a fact in the knowledge of the Court, with the additional combinistic fact that when the defendants came the second time, at 4 o'clock, their last theft was demenstrated on the spot by an immediate search, which found two more pieces of silk dropping from under their clothing.

After the plea of guilty, therefore, by Mrs. Johnson, the Court proceeded to sentence both together. The Judge remarked upon the necessity of making a severe example of both of them. The prevalence of this peculiar species of larceny had become dangerous to traders and business man, and they had begun to feel as if there was no safety from theft by customers at their very counters. The sentence of the Court. She deposed that she was born in England, was 30 years of age, and resided at No. 345 Houston street. Both were respectable looking women, but t

The Stock market was active this morning, especially in Reading, Eric and Southern, and there was a general upward movement in prices. The transactions sum up over 20,000 shares stock, \$110,000 bonds. Included in the shares were 6,200 on buyer's option, and 5,800 on seller's option. The most active stock opening at 75 and closing at 76. A dispatch received rom Philadelphia contained the intimation that the large sale, about 20,000 shares, recently made by the party heretofore operating in the stock for a rise, was made under a doubt as to the payment of the July dividend, but we hear no confirmation here of the doubt. Eric improved from 321 to 331 a 334. The principal operations in New-York Central were in sellers option. The market was steady at the close at 834. The earnings of May show a decrease of \$48,066. Michigan Southern was quite buoyant, selling as high as 464 after the Second Board, an improvement of 31 \$\psi\$ cent on Saturday's price. Toledo was also buoyant, going to 591. The election for Directors of this road takes place on Wednesday, when one or two changes will probably be made. Harlem was strong, 111 being bid for 1,000 shares. A sale of preferred was made at 25. Pacific Steamship continues to advance, and sold to-day at 79. Galena and Rock Island were strong, and in demand at better prices. The only important transactions in State Stocks was a purchase of \$50,000 Missouris at 831. The Western banks are beginning to run up their circulation again, and are buying some State stocks here for that purpose. Illinois Central Bonds

sold at 97, and Galena 2d Mortgage at 76. There is not a large demand for Sterling for the Wednesday packet. Rates show no important change, but are rather heavy. Sterling 91 291; Francs 5.181

We understand that the Panama Railroad Company have withdrawn their Bonds from the London market, as their limits could not be obtained in the present stringent state of the Money market, and the necessities of the Company are not urgent. The usual cash lividend will be paid in July.

The Weekly Bank Statement, of which we give the efficial figures below, shows a smaller amount of loss in the specie reserve than might have been anticipated after the large drain of the past week, and in view of the fact that the California delivery per George Law did not come into the account until Saturday. The result shows that the receipts from the

Messrs. Duncan, Sherman & Co. have been consti-

tuted agents of the City and County of San Francisco for the payment of the interest due 1st July on \$200, 000 Fire Bonds and \$321,500 Civil Bonds of the City of San Francisco." A telegraphic dispatch brings us advices from Co lumbus, Ohio, of the resignation of the State Treas-

arer Gibson and the appointment of A. P. Stone of Columbus to fill the vacancy. A deficiency of \$550,000 in the Treasury had been made public. The deficit is not a new thing, having taken place in 1854, while J. G. Breslin was Treasurer, and has been known to a few parties for some time past. Breslin is supposed to have sunk this amount in Indiana banking. Gibson (the late Treasurer) and Breslin are brothers-in-law. This deficit, being an old affair, will not embarrass the State per interfere with the payment of the July interest on the public debt, the money for which is already on deposit at the agency in this city. There is rather more activity in money to-day, but

the supply is quite abundant on call at 6@7 & cent. The large arrivals of specie at present being moved must of course cause considerable changing of loans There is perhaps rather more paper offering, but the demand is still good at 7 29 * cent for first-class.

We hear of about a million of gold going to Boston for the Wednesday steamer, and the shipments of the week will probably exceed two millions. The Atlantic and Vanderbilt both go on Saturday next. Messrs. Atwood & Co. and the La Crosse Railroad

Company will occupy the basement rooms of the new Continental Bank building in Nassau street, next Messrs, Duncan, Sherman & Co. The Bank took possession of its new quarters to-day.

Mr. Berdan is building four of his Automatic Ovens in this city-two on the east side, and two on the west side of the town. He has abondoned the intention of rebuilding in Brooklyn. The saving of cost by Mr. Berdan's system is great, and was thoroughly tested at the Brooklyn bakery. If Mr. B. can furnish the poor of this city with better bread and more of it for the same money, than bakers can by the present system, he must be looked upon as a public benefactor.

We have received a communication speaking very highly of the good qualities of the bituminous "Broad Coal. The Broad Top region is in Pennsylvania, and the Coal is brought to Baltimore by the Huntington and Broad Top Railroad. The Northern, Central and the Pennsylvania State Roads use this Coal for their locomotives, and are well satisfied with it. With the anticipation of free receipts, boats having

arrived at Albany from Buffalo, the Flour market is 10c. ₽ bbl. lower, with a good demand. Wheat is dull and unsettled, and Corn is 2c, lower. Pork con-Gnues dull, with a decline of 10c. on mess. Buyers do not come forward for Sugars at present rates. Coffee is fairly sustained, as is Tea; but Molasses is duil. In Cotton there is a moderate business at steady prices. The gross receipts now reach 2,860,000 bales, a decrease of 545,000 bales upon those of last year to the same date, but an increase of 322,000 upon those of the year previous, when the total crop reached 2,847,000 hales. But subsequently to this date that season 310,660 bales reached the pons. This year, on the commany, it appears questionable if the future deliveries will exceed 100,000 bales. The exports continue very light-only 12,000 bales having cleared this week for Great Britain, against 62,000 in the corresponding week last year. The deinterior are more important than we had supposed, orease, as compared with last year, is now 465,000

bales, and will probably run up to 500,000 within a few weeks. This is mainly owing to the nausual backwardness of the season, which has inspired confidence, not only in shippers for the Continent and in American consumers to increase their stocks, thus leaving the less for England, but also in factors and speculators in this country. They have shown such tenacity that, notwith-tanding the receipts to this date being 545,000 bales short of those of last year, the stock is now equal to what it was then in the number of bales, while in money value it is very much greater.

The Circular of Messrs. O'Neill says:

The following is a statement of the movements of it past week, and since 1st September last, compar ar preceding years:

Thus Receipts show a failing off of \$45,000 from those of last year, and 250,000 from 1852-3, and the Exports exhibit the following results:

1856-7. Dec. 465,000 104,000 97,000 666,000 Inc. 2,000 1825-3. Dec. 465,000 100,000 97,000 666,000 Inc. 2,000 New Core-The accounts to hand during the past week respecting the condition of the growing crop are more unaimously favorable. In our two last circulars it would be seen that a havorable change had taken place at the South, the weather having become precisely what was needed to retrieve the plant from its precarious condition where it had suffered most, and it appears that the improvement thus brought about has been very general throughout the whole cotton-growing region. In the sections which escaped the worst weather, it is reported that the prospect for a large grop are equal or superfur to those of any former years; and in others which embrace the plincingle portion of the cotton area, the only complaint is that of the crop being two or three week later than is usual at this season, while from a very few others we read that the effect of drougth and the backward Spring may still be traced upon the plant so it has not yet fully attained a strong and hasilby appearance. In the former of these it is plain that on apprehension is entertained of a deficient yield, but the revorse, and in each of the latter it is confidently expected that with the rapid progress it is now making. A continuance of fine weather is all that will be necessary to produce an average yield from the whole of the ground that has been planted, which it will be received the former of the Canton Company gives.

The report speaks of the approach to completion of the Nothern Central Railroad, which has its depot on this Company's grounds, and which, it is anticipated, will attract a large amount of business. Various valuable improvements have been made during the year to meet the demand for lots, a large fireproof wasehouse, erected by the Company rather in advance of the wants of trade, has been converted into a bonded warehouse, and is now well filled with goods at profitable rates of storage. The Company have under consideration a plan of receiving for future sales of lands one-half the price in cash and one-half in stock at \$30 P share. At the scale fixed for the lands, the entire property would return shareholders \$70 P share.

The President thinks this scheme free from objection, and calculated to produce a gradual liquidation of the
